**AMCS WastePay**  
The fast and simple way to automatically Manage your waste payment and collection.

As leaders in pay-by-weight systems, AMCS know that some waste collection service providers were a quick and simple way to run their waste payment collection, AMCS WastePay is your way to automatically collect payments and pick-up only paid for waste.

With WastePay, customers pay bin credit, on their mobile phone, just like a Pay-as-you-go mobile phone.

Visit Shops | PAY ZONE | Tip up credit | 2 HOUR LATER | CREDIT AVAILABLE

WASTE COLLECTED | TAKE BIN TO KERBSIDE

AMCS WastePay

No credit, no lift - its as simple as that!

## So What Can Photografic Offer You?

### Experience....

My experience has been gained over a successful career of 33 years with Jaguar Cars, and as a free lance designer for the last 3 years. As a Jaguar Design / Manager I had to ensure that my design program objectives were achieved right from the concept approval through to design and engineering approval, development, marketing, launch release and ultimately production. This cross functional awareness is evident in the service I can offer today. Notable professional achievements include design and development of Jaguar's current aluminium XJ Saloon Car Exterior, Jaguar's postponed F Type Sport Car Interior, and responsibility for the design and development of many other Sport and Saloon Interior programs stretching back over 25 years.

### Skill....

I have the abilities to mix professional free hand illustration techniques with the latest digital media applications like Adobe Photoshop and Illustrator, Dreamweaver, In-Design, Rhino 3D, and Flamingo ray tracing software.

### Customer Commitment....

To provide high quality natural and digital art / design services ranging from technical illustration and visualisation, to graphic, web and product concept design with a high degree of customer satisfaction.

### Coventry City Centre

Follow the Coventry Ring Road to junction 5. Exit the junction along Mile lane and take the first left into Puma Way at the first set of traffic lights. Travel along Puma Way to the island and take the first exit into the Technocentre. You can choose from 2 car parks which are barrier controlled. Please ensure you have your barrier exit code from reception before leaving.
